

be.tex® Expandable Premium FR

Art.No. 04468-XXXX-0026-BE

Description

be.tex® Expandable Premium FR is a very opaque fabric and it's extra soft and supple. The unique colour boost coating creates vibrant colours. The textile is extremely elastic and is therefore well suited for pop-up display systems, table covers and zipper walls. With careful handling, the material can also be folded printed. Due to the multitude of influences during printing and application, selftests are indispensable. A legally binding assurance of certain properties of the fabrics cannot be derived from the above information.
