

TECHNICAL DATA SHEET

Grade:	TRANSJET® Sportsline 9310
g/m²:	100
Thickness:	131 µm
Characteristics:	<ul style="list-style-type: none"> Coated sublimation paper for digital transfer printing with water-based dye sub inks, with a thermal adhesive coating
Applications:	<ul style="list-style-type: none"> Sports and functional textiles, personalized interior, skis and snowboards
Advantages:	<ul style="list-style-type: none"> High transfer rate Good drying time Sharp text and fine lines as there is no movement between paper and fabric Tack between sublimation paper and fabric after transfer
Transfer settings:	To activate the tack of the paper, we recommend a transfer temperature not lower than 200 °C
Colour release:	Recommendation (depending on fabrics, testing essential): <ul style="list-style-type: none"> 205 °C temperature 45 seconds
Suitable ink systems:	Water-based sublimation
Shelf Life:	2 years guarantee under following conditions: <ul style="list-style-type: none"> Original wrapping Ideal storage conditions are at 45% relative humidity and 23 °C temperature. Humidity and other external influences are such which can be expected from the storage of paper products
Handling:	The paper has to be protected from moisture. Avoid marking the paper with fingerprints. Ideal printing room conditions are 45% relative humidity and 23 °C. A relative humidity of over 60% can affect the picture quality. Printouts with pigmented inks have to be protected from smudging for a short time until the pigments have completely anchored themselves in the coating layer.
Availability:	Plotter rolls 100 g/m ²
