

be.tex® Salsa Dyelux FR

Art.No. 04637-XXXX-66-BE

Description

The name be.tex® Salsa Dyelux stands for itself. Luxurious fine fabric brings your lightbox prints to the perfect appearance. The colour boost enhances the colours and the light diffusion coating allows them to shine. This ensures that even detailed images are displayed precisely. Use bergertextiles flat profiles (winded on spool) to frame the fabric. Latex printing for backlighting requires high ink application. Important: Run a print test! Many factors influence the textile during printing and application. All technical data were determined according to the current state of measurement technology and reflect the values of the measurement sample. Despite the highest quality standards, there may be production deviations – all information are legally non-binding and without guarantee.

Main Application

Lightbox

Applications

Banner
Light boxes
Projections (front/back)
Shower curtains
Stand Construction

Features

Crease resistant
High white
Light diffusion coating
No fraying
Smooth surface
