

DP SERIES

Piece & Roll to Roll Transfer Printing Machine

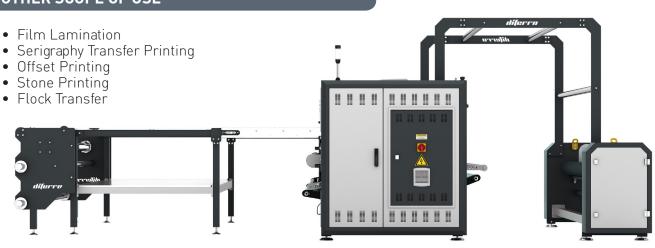

Our latest "DP" Series has evolved and includes many unique new features. We have created a truly cost-effective machine that is built to last, offers multiple configuration choices and the performance required for an efficient high-speed print finishing experience. Whilst mainly used for textile transfer printing, the DP Series can also be used for other heat transfer applications

OPERATION TYPES

- Digital Paper Rolls to Pieces of Fabric
- Digital Paper Rolls to Rolls of Fabric
- Digital Paper Pieces to Pieces of Fabric

OTHER SCOPE OF USE

THE DRUM

The drum is made of ST44 drawn steel pipe and all standard models are finished with surface grinding. On request the drum surface can also be plated with either chrome or Teflon. Inside the drum is one single heating unit that consists of three pieces. The drum is filled with transfer

heating oil that fills up 60% of the inner volume. The failsafeswitch mechanism helps balance the inner pressure, and will deactivate the machine should there be any issues regarding the gasses generated by heated oil so to avoid injury or damage. The heat sensor is placed on the surface of the drum, this enables more accurate readings and provides better print results. Maximum Working Temperature and Temperature Restrictions can be easily adjusted via the Touch-Screen Panel.

THE FELT BELT

All of our machines are equipped with 100% Nomex seamless industrial felt belts that are reinforced with Kevlar material in order to avoid stretching. The expected lifetime for the belt on this unit is between 3 & 5 years depending on use. In order to eliminate movement of the felt belt to either side the machine is built with an automated-felt centering mechanism. The felt tension and the felt centering system are both air-operated (Pneumatic). Should the compressor fail to supply the required air for the system, the machine halts and alerts the operator to prevent lasting damage to the belt

TOUCH-SCREEN PANEL

- General control of the machine such as speed, temperature etc.
- Meter Counter
- Weekly Programming
- Auto- Cooling
- Touch-screen to Access various functions

MATERIAL INPUT / OUTPUT CONTROLS

Protection Paper

Input : Pneumatic Brake System **Output** : Manually Adjusted Automatic Rewind

Digital Paper

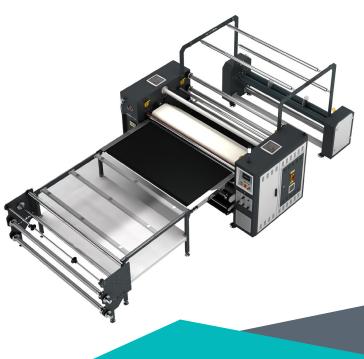

Input : Manually Brake System **Output** : Manually Adjusted Automatic Rewind

Roll Fabric

Input : Manually Adjusted Fabric Tension System **Output** : Manually Adjusted Automatic Rewind

Piece Fabric

Input : Manually laid on table
Output : Potency controlled , off the conveyor belt
